

Solo X wireless combo pairing instructions

Wireless Mouse only

- 1.Remove USB receiver from underside of mouse.
- 2.Insert receiver into available laptop USB socket.
- 3.Insert AA disposable or re-chargeable battery into compartment with polarity as indicated and replace cover.
- 4.Your mouse is now connected.

or

As part of Solo X wireless keyboard / mouse combo

- 1.Remove USB receiver from underside of mouse and save for use later if you lose the unifying USB receiver.
- 2.Obtain the unifying USB receiver from the keyboard tilt-strip accessory.
- 3.Insert receiver into available laptop USB socket.
- 4.Switch on keyboard using the switch on the right-hand edge.
- 5.If the blue LED flashes press the Esc and K keys simultaneously and then release.
- 6.Insert one AA disposable or rechargeable battery into mouse battery compartment with polarity as indicated and replace cover.
- 7.Your keyboard and mouse are now connected.

Note:

If you lose the unifying mouse, then switch off keyboard, and remove mouse battery. Obtain original USB receiver supplied with mouse and insert into laptop and repeat steps 3 to 7.

Auto power-save

These features will deactivate mouse and keyboard when not in use and removing the USB receiver from your laptop will turn off the mouse and keyboard for transportation.
